Species	Date(s) Observed	Spawning	Rearing	Migration
Pink	July 25, 1989	X		

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

About 40 adult pink salmon were seen in the marshy slough waters in the drainage at the head of Paguna Arm of Two Arm Bay. There was also evidence of black bear predation. Rearing habitat looks very favorable for pink and chum salmon.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
